(a) Shared responses influence commands

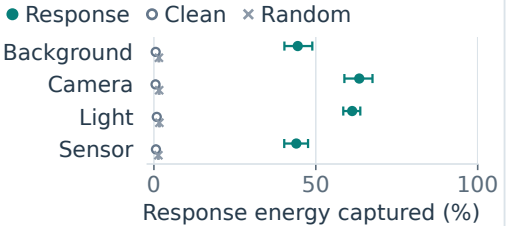
$\pi_{0.5}$ · internal recordings and an independent intervention

Clean

Camera +15°

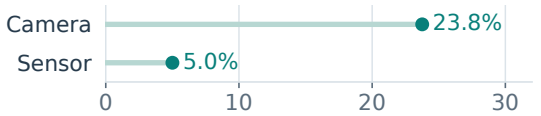
Illustrative input pair
Same physical state

L9 · 16 shared channel directions



Independent L9 restoration

Initial-command error



0.409 → 0.312

0.209 → 0.199

(b) Small motion, lower task success

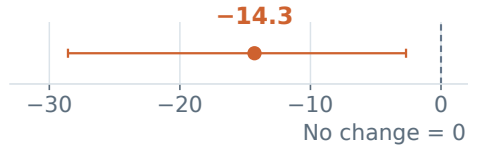
π_0 · Sensor Noise · independent executions

End-effector separation · 5 controls

Relative to clean resampling

Task success: perturbed − clean

Percentage points



55 matched settings · 28 tasks
